

LIST OF U.S. CUSTOMS LABORATORY METHODS

USCL NUMBER	METHOD	TITLE
81-01	ASTM E 315	<u>Test Method for Chemical Analysis of Molybdenum</u>
81-02	ASTM E 35	<u>Method for Chemical Analysis of Molybdenum Magnesium and Magnesium Alloys</u>
81-03	ASTM E 354	<u>Method for Chemical Analysis of High-Temperature, Electrical, Magnetic, and Other Similar Iron, Nickel and Cobalt Alloy</u>

U.S. CUSTOMS LABORATORY METHODS

USCL METHOD 81-01

Index

ASTM E 315 Test Method for Chemical Analysis of Molybdenum

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

This method covers the chemical analysis of molybdenum and molybdenum alloys. This is one of the methods that can be used to determine the composition of molybdenum and articles thereof provided for in Chapter 81 of the Harmonized Tariff Schedule of the United States (HTSUS).

USCL METHOD 81-02

Index

ASTM E 35 Method for Chemical Analysis of Molybdenum Magnesium and Magnesium Alloys

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

This method covers the chemical analysis of magnesium and magnesium alloys. This is one of the methods that can be used to determine the composition of magnesium and articles thereof provided for in Chapter 81 of the Harmonized Tariff Schedule of the United States (HTSUS).

USCL METHOD 81-03

Index

ASTM E 354

Method for Chemical Analysis of High-Temperature, Electrical, Magnetic, and Other Similar Iron, Nickel and Cobalt Alloy

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

This method covers the chemical analysis of high-temperature, electrical, magnetic, and other similar iron, nickel, and cobalt alloys. This is one of the methods that can be used to determine the composition of cobalt alloys and articles thereof provided for in Chapter 81 of the Harmonized Tariff Schedule of the United States (HTSUS).
